

**DRYLAND  
PASTURE MIX**

# Alberta Green

A mixture of hardy, drought tolerant cool season grasses that thrive in Alberta’s harsh growing conditions. Alberta Green Dryland Pasture Mix provides a thick spring forage and with strong regrowth in the fall. This mix is well adapted to perform in many soil types and elevations of 3,000 to 10,000 feet. Ideal for areas not receiving regular irrigation. This mix will produce a hay crop depending upon available moisture.

- 20%** Tetraploid Perennial Rye
- 20%** Smooth Brome, Lincoln
- 15%** Paiute Orchardgrass
- 15%** Hycrest Crested Wheatgrass
- 15%** Pubescent Wheatgrass
