## ROCKY MOUNTAIN NATIVE MIX

This lush, beautiful blend of native cultivars is perfectly adapted for the Rocky Mountain region. Hardy and self-reliant blend, with exceptional cold and drought tolerance. Adapted to many soils and the extremes of this growing region. A ideal choice in low maintenance applications where aesthetic and performance are valued.

- 20%** Slender Wheatgrass
- 20%** Mountain Brome
- 15%** Green Needlegrass
- 15%** Thickspike Wheatgrass
- 10%** Rocky Mountain Fescue

- 5%** Blue Grama (Coated)
- 5%** Indian Ricegrass
- 5%** Sandberg Bluegrass
- 5%** Bottlebrush Squirreltail

### Characteristics:

- Germination in as little as 5 days
- Growing height between 25"-36"
- Exceptional drought tolerance
- Great for holding sloped and mountain soils

### New Seeding:

- Broadcast: 20-25 lbs/acre
- Drilled: 15-20 lbs/acre

### Overseeding:

- Broadcast: 10-15 lbs/acre
- Drilled: 5-10 lbs/acre
